- *Disaster Emergency Evacuation Preparation **Workbook** – Part I*
  - Provided to help you review and complete the exercises

Please have them available as you review this presentation.

Disaster Emergency Evacuation Preparedness™

This training is designed to help you learn about and manage the essentials of effective emergency management.

The icons below will indicate opportunities through the training to take action using the available materials.

Click on the icons here to download the Manual and Workbook.

Manual – check out the Manual

Consider – think about this

Workbook – use the Workbook

Preparation is the key for effective emergency & disaster management and involves basic standards for effective plans.

During this training, you will learn about the importance of **planning ahead** for an emergency, and you will begin **to prepare** an emergency plan for your program.

How prepared are you right now?

Write down all of the items in your car and on your person RIGHT NOW which could be used during an emergency.

Workbook – p. 17

What have you experienced?

Wind

Fire

Flood

FOR YOU:

- What is the expected?
- What is the unexpected?

DUST

Chemical

Heat not only affects people, it affects the materials – structural, electrical - that surround us

Power outages, especially during a heat wave, can impact transportation, health and emergency services… And child care.

What types of disasters could occur in your area?

- Natural disasters ☐
- Fire/smoke emergencies ☐
- Human-related disasters ☐
- Utility disruption ☐

Some of these disasters may be more likely than others, but the unusual can occur anywhere-who would have expected an earthquake in Sedona? Floods in Phoenix? Or frozen water pipes in Tucson?

Natural Disasters:

Wild fires
Thunder & Lightning
Dust storms
Tornado
Hurricane
Floods
Snow and Ice storms

Fire & Smoke Emergencies

Human-related Disasters

Hazardous materials

Bomb threats

Suspicious articles

Potentially violent situations:

- Hostage
- Random acts of violence
- Disgruntled or impaired staff, parents
- Missing child

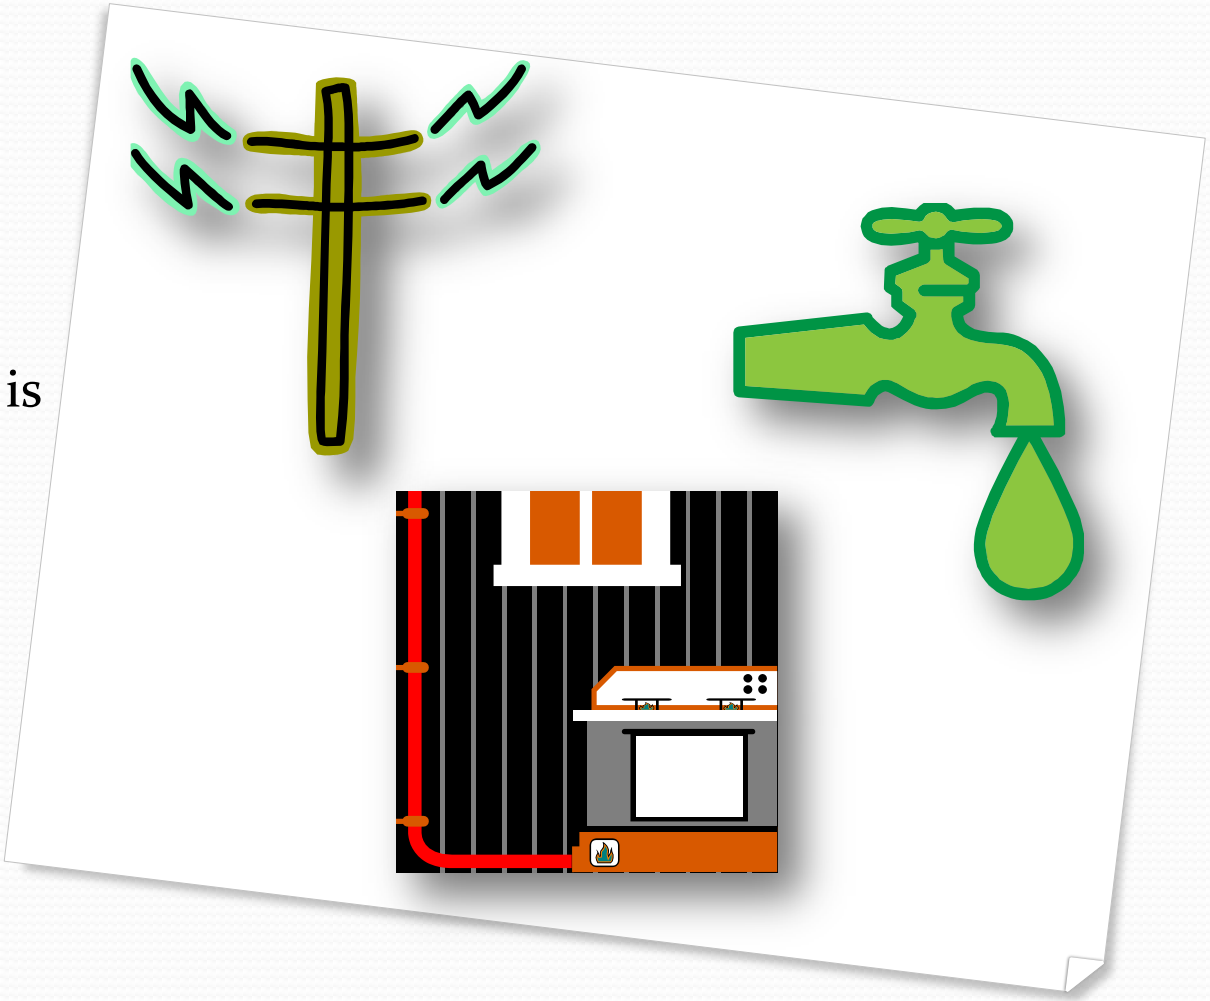
Utility Disruption

What if the **electricity** is out?

Or the **water**?

Or **gas**?

Other services?



Consider

Write down examples of disasters or emergencies that:

Have occurred IN or NEAR your facility

COULD happen nearby:

Workbook – p. 19
